BatchMaster ERP for API

Ensures active growth of your business

The API industry has witnessed steady growth in recent times, but with large volume of business involved, and the fact that APIs are manufactured through a very complex process utilizing a range of processing technologies — chemical synthesis, extraction, cell culture/fermentation, gene therapy, use of blood or plasma as raw material, by recovery from natural sources, or by any combination of these — mean the API manufacturers have quite a few challenges to deal with. Adhering to strict safety and quality standards, controlling costs, addressing pressure to reduce waste and manage the by-products efficiently, facing intense competition in the highly-fragmented market, etc. are some of them.

BatchMaster ERP for API, a customized ERP for manufacturers of innovator medicines as well as generics, is one complete solution which serves all their needs. It streamlines all processes of API manufacturing, right from procurement from certified vendors, inspecting multi-level production and synthesis process, to physical processing & packaging. BatchMaster ERP for API also ensures efficient management of by-products, transparency in supply chain, bi-directional traceability, and fulfilment of all the documentation requirements of FDA etc. Besides, it also gives access to the real-time information in a single system, allowing you to make smarter and faster business decisions.

Products:

BatchMaster ERP
Our Flagship product, BatchMaster ERP, is a true process-centric solution serving the manufacturing, distribution, finance, compliance and quality needs of your business.

BatchMaster Point-Of-Sales (POS)
A web-based software solution for wholesale, distribution, and retail businesses, it can be used online on iPads, Android tablets or laptops. By syncing the complete information of products, customers, and orders into a single platform, it makes it easy to scan products, check for inventory, apply discounts or offers, and accept payments both in plastic money as well as in cash. Ultimately, helping retailers improve customer service, increase productivity, reduce thefts and offer better retail experience.

Integration with MAGENTO:
Integration of BatchMaster Enterprise with Magento helps manage your business online. The integration provides a seamless method to completely collaborate your ERP system with your current or upcoming Magento stores. Via this integration, orders from your Magento store and website will automatically be loaded into the BatchMaster Enterprise ERP solution – along with an alert about order arrival. It enables complete synchronization of item records, price lists, inventory, taxes, business partners, orders, deliveries, shipping & tracking, and payments.
